General Comments

Monitoring Inspection - Full Day Program - PD Day:

Children and educators were observed engaged in a variety of activities this morning including building, outdoor play, open-ended art, exploring Magnatiles and indoor gross motor games. A small group of children were testing their limits by creating a long jump with foam bricks; the children took turns jumping as far as they could. Their educator adequately supervised and encouraged them to try new distances.

Purposeful planning is evident through documentation, invitations and materials added to the environments that support the children's current interests. A science experiment about handwashing/germs is displayed for the children revisit.

Surfacing around the playground structures is pooling away from fall zones. Ensure surfacing is evenly distributed with a rake in fall zones.

Monthly fire drills are documented.
Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection.
New staff file (4) review was completed; one staff file missing Signed Statement; to be added. The QA Monitor discussed updates to legislation regarding staff records with the Administrator. It is now required that each staff member's contact information be included in their file. Ensure that all staff files are updated.
PreK children were not present during inspection.
