General Comments

Licensing staff arrived at the facility to perform a Monitoring Inspection. Upon arrival the children and Operator were engaged in an indoor water play activity. The children were seen laughing and smiling as they used measuring cups to scoop the bubbly water and transfer to another container. Throughout the morning the children freely explored a variety of activities. The transition from one activity to another was calm and children were eager to help clean up with the Operator before moving to the next activity. A mini shopping cart was added to the play kitchen area, the children were observed filling it with play grocery items.

The Operator offered a circle time for those who were interested. The children were observed singing songs, reading stories and having a class discussion about shapes and colors. The Operator ensured that circle time was child led, moving to a new activity once the children were no longer interested in circle time. The Operator announced that the group had 10 more minutes before preparing for lunch time. Proper hand washing was observed before the child sat for lunch.

The Operator is kind, patient and respectful when interacting with the children. Only positive child guidance was observed. The indoor environment is clean, organized and inviting. The child appeared comfortable with the Operator and the routine. Learning stories, family pictures, webbing and pictures of the children were displayed throughout the facility. The children's belongings were labelled and tidy. Posting board displayed all required documents.
