General Comments					
A renewal inspection occurred today.					
Children were observed in the outdoor environment playing grounders, grating chalk, playing and exploring the sand pile and exploring the play equipment. The educator was observed using positive child guidance and had a very calming nature to her approach when speaking with the children. The indoor environment was set up with a wide variety of open-ended materials. Invitations were set out to welcome children after playing outside. The children could create their own musical instruments, have Lego challenges or dine at a restaurant in the dramatic play area. Evidence of planning and documentation was current and reflected the children's emerging interests. All files were reviewed. Facility is recommended for licensing pending Fire recommendation.
