General Comments

There is evidence of planned programming throughout the facility as noted through the artwork and learning stories posted on the walls.

Educators were observed sitting on the floor with the children playing and reading stories. They were responsive to the needs of the children and the children appeared to be comfortable with them.

Children were engaged in a variety of activities throughout the facility such as mark making, playing with playdough, building towers with blocks, sensory bins with snow and dressing up in the dramatic play costumes. Staff and administrative files were reviewed. All the files were up to date.

I recommend a larger table and more chairs be added to the Junior Toddler room as when the children were mark making there was limited space and only 3 chairs available for the children.

Everything seem to be running well during the visit.
