### General Comments

The Quality Assurance Monitor is on-site for a monitoring inspection. The Quality Assurance Monitor was on-site during nap time, indoor free play and snack time.

The ratio was respected during the inspection and the Quality Assurance Monitor was able to observe an educator comforting a crying child during nap time and rock the child in their arms.

The QAM had a discussion with the operator and the on-site administrator regarding the outdoor stationary equipment and the use during the winter. It was confirmed that the structure would not be used during the winter as the protective surface would be covered with snow and hardened from the cold.

The Quality Assurance Monitor observed a notice for communicable disease posted in a visible area to notify the families. The Quality Assurance Monitor observed 3 educators disinfect toys and surfaces during the inspection.

The Quality Assurance Monitor observed that the hole in front of the outdoor play area entrance has not been repaired. The operator was on-site during the inspection doing some minor reparations and have confirmed that this will be repaired soon.

The administrator has confirmed that they are currently working on getting the child and staff records up to date. The records will be verified at a later date to ensure that they are complete.
