General Comments

The Quality Assurance Monitor is on site for the first monitoring inspection since the facility has been opened. The ratio is respected at the time of the inspection. During the visit, these elements were verified:

- If all required documents are posted in a visible and prominent place in the facility.
- Child records files and signed consent
- Child guidance
- If children's personal belongings are labelled with the name of the child, used only for the intended child, and stored separately for each child.

All child records are in order and all required documents are posted in the facility.

The facility has a separate locked storage space that is inaccessible to the children for toxic products, chemical products and cleaning supplies. The QAM was able to observe outdoor play and indoor free play. The transition to outdoor play was also observed, when the children returned outside for a second time.

No non-compliance during this visit.
