General Comments

The Quality Assurance Monitor is on site in the morning to conduct a monitoring inspection. The ratio was respected during the inspection.

The following elements were verified:

- Ratio
- If all required documents are posted in a visible location in the facility
- Staff record's
- Checks
- Qualifications and training
- Administrative records maintained on site
- Daily activities
- Child guidance

The Quality Assurance Monitor had a discussion with the operator regarding the documentation of the daily activities. During the inspection, it was observed that daily activities had not been documented for each day of the week for the past weeks. A reminder was provided to the operator regarding the requirement to maintain complete and accurate records of daily activities.

The children were observed engaged in playing in the indoor play area, collaboratively building towers with Tonka trucks. They were later observed transitioning to the outdoor play area. Positive interactions and supportive engagement were observed between the operator and the children throughout the visit.
