Full-time Early Learning and Child Care Centre	30	PRESCHOOL
ELCC Licensing Staff	**Position Title**	
Aimee Hanson	Inspector	

Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

A renewal inspection was conducted on July 2, 2026. Children were observed in both the indoor and outdoor learning environments.

In the Two/Three Room, a variety of materials were available to support children's learning and exploration. A tuff tray containing numbers and letters and sensory bottles filled with coloured water were accessible to children. Educators were observed folding laundry and preparing fresh bedding for nap time. A cozy reading area included books, cushions, a rug, and plants. During the transition to lunch, an educator read a book about potty training, supporting children's developing self-help skills.

In the Three/Four Room, the environment reflected children's interests in animals, ocean life, and bees. A Canada Day sensory experience was set up using red and white rice. An "Emergency Room" dramatic play area had been created with props and visual materials to encourage imaginative play. A classroom memories book containing photos of past experiences and activities was available for children to revisit and discuss together.

Throughout the inspection, educators were observed engaging positively with children by participating in play, encouraging conversation, responding to children's interests, and supporting learning through meaningful interactions.

Lunch consisted of macaroni, hamburger, peas, and carrots. Morning snack was oatmeal, and afternoon snack included yogurt and muffins.

All staff files were reviewed and found to be complete, including documentation of required professional development hours. Twenty children's files were reviewed and found to be complete.
The outdoor play area offered a variety of experiences, including climbing structures, tunnels, balls, shovels, wheelbarrows, and a wooden play car. Educators were observed outdoors with children participating in water play activities using a hose and buckets.

It was noted that a gazebo is scheduled to be installed later this month to provide additional shade on the

General Comments
playground. At the time of the inspection, some areas had limited shade coverage during the afternoon. Licensing recommended submitting a photo once installation is complete or arranging a follow-up visit to verify completion. The parent information board was reviewed and contained all required information.
