General Comments

A Monitoring Inspection occurred September 24, 2025

The children were engaged in a variety of activities across both indoor and outdoor environments, including transitions between the two.

Indoors: The children were observed play board games and participating in open-ended art activities both individually and in groups, using a variety of materials. These included markers, pencil crayons, stickers, jewels, scissors, cardboard, boxes, and coloring pages. The educators indicated that the children are currently interested in art, farms, specifically chickens, and Halloween.

Outdoors: The children were observed using the stationary equipment, building a fort with logs, and looking for bugs.

Positive child guidance techniques were observed throughout the facility. Educators were at the children's level, providing appropriate supervision, using positive language, offering choices, and assisting children in decision-making.

A clearly visible and prominent area was designated for posting the facility's license, current monitoring reports, and any orders for compliance. Additional documentation observed included incident logs, daily attendance records, and records of evacuation and monthly fire drills.
