General Comments

The Quality Assurance Monitor is on site to conduct the first monitoring inspection since the opening of the facility.

During the inspection, the following elements were verified:

- Child record files
- Child guidance
- Child-to-staff ratio
- Daily activities
- If children's personal belongings are labelled with the name of the child

Child-to staff ratio is respected during the visit.

During the inspection, children were observed playing indoors and transitioning to outdoor play. Positive interactions between educators and children were observed, such as getting to the children's level to communicate and engage in play. During the first few weeks of operations, educators have been working on their daily programming and documentation by making observations and getting to know the infants. Through this process, educators demonstrate that planning is a process that involves engaging the children and reflecting on their interests, passions, strengths, and abilities.

no non-compliances during the monitoring inspection.
