Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

- Late afternoon visit to the establishment for an unexpected monitoring inspection
- Ratio was respected during the visit
- All staff records contain required checks and documentation
- The administrator as well as all educators have a valid first aid certificate
- Monthly emergency evacuation and fire drills are completed
- A monthly review and maintenance plan is completed on all stationary equipment
- Children and staff daily attendance are maintained on site
- No medicine is kept on site
- Whitin the afterschool program the daily routine consists of a snack when children are arriving from school, a free play period and/or a structured activity is proposed and outside play time at the end of the day
- During the visit, it was observed that the educator is engaged with the children at their level providing support, having conversations and being attentive to the children's needs.
- Toxic products, and cleaning supplies are locked under key and are inaccessible to children
- Each child has an easily accessible space to store their personal belongings, which is labeled with their name and used only for the intended child.

Observations: When arriving at the afterschool program, children gather in a greeting circle. One child shared with the group the birthday gift she received and then everybody shared something they're excited about. They all went to wash their hands, some had snack while others transitioned to free play, tabletop play was suggested, Legos, Play-Doh, drawing, reading in the tent, magnet tiles...etc. The plan is to go play outside after the free play period.
