General Comments

- Visit completed at the facility in the morning for a monitoring inspection.
- Ratio was respected during the visit.
- Positive child guidance was witnessed during the visit in the preschool room. The educators are at the child's level, discussing with them, engaged in their play, providing support and having conversations. During the visit, a situation arose between two children regarding the sharing of the toys. The educator discusses and guides the children on how to reflect their feelings and use words when angry, frustrated or sad.
- Child files contain all required documentation. 42 files were verified during the visit. Consent forms are signed by the parent or guardian.
- Material in the outdoor play area is varied and in sufficient quantity for all children present. The director says that the stationary equipment is installed, according to CSA standards.
- When accessing the public pool, a lifeguard is on duty and the reduced child-to-staff ratio is applied.

Observations:

2-5-year-olds: During the visit, the children were in the pool. After the pool activity, the children participated in free play. During free play the children created art, played with the kitchenette and created using the connect sensory blocks.

Afterschool room: Upon my arrival, the children were preparing to go to the park.
