General Comments

Renewal Inspection:

The classrooms were well organized and equipped with a wide range of age-appropriate materials for school-age children. Clear learning and interest centers had been established throughout the environment. During the inspection, the inspector discussed the addition of further materials with the on-site administrator. The administrator advised that additional resources have been purchased and will be added to the classrooms prior to children being enrolled. The on-site administrator agreed to provide photographs to the inspector once the setup has been completed.

There were no children enrolled at the time of the inspection. As a result, the following items could not be reviewed during the renewal inspection:
- Child records
- Daily attendance records
- Emergency evacuation and fire drill records
- Management of Potential Illness forms
- Incident records
- Daily activities
- Daily routine

The Quality Assurance Monitor will verify these items during the first monitoring inspection.

All staff files were reviewed and found to be complete.

The facility is recommended for licensing, pending fire recommendation.
