### General Comments

A renewal inspection occurred today. Positive child guidance was observed by all educators. Educators were on the children's level, asking meaningful questions, giving each child a sense of belonging. Learning environments were each set up with open ended props and materials ready for the children to explore. Multiple children were observing rocks/minerals and learning fun facts about each of them with their educator. The materials and documentation present were reflective in children's current interests and curiosities. Painted rocks with pictures (donated by a special person) were among many forms of props that were natural, familiar and life like that represent children's home environments. All children and staff files were observed and complete. All checks were documented and complete. Documentation was in various forms throughout the learning environments. Photos were printed for children and families to view and demonstrated ongoing group project work and individual work in progress.
