General Comments

A monitoring inspection was conducted on July 22, 2021. Not all outstanding orders for compliance were rectified. The expectation is that all are completed by comply by date.

Discussed with administrator that educators, when asked, should know the number of children that are in their care without referring to the attendance records.

Discussed the tracking of outside time to ensure children are gong outside for a minimum of two hours per day. This is being done and appears to be working.

Discussed the new fence that is going to be installed and QAM will inspect on next monitoring visit.

Discussed with administrator the use of water/nerf guns. Referred admin to the document "Bang, Bang, Gun Play" to review with educators. Also, having the educators sit down with the children to come up with rules. Children are capable and competent learners and having meaningful conversations with them regarding proper use of water/nerf guns prior to using them will be beneficial. Children seem to follow rules regarding play if they make them themselves and are more accountable for them.
