Comments: Deficiency is now compliant			

General Comments
<p>A renewal inspection occurred today. Educators were observed using positive, supportive communication with each of the children. Educators met children at their level, asking open-ended questions, "tell me what you created", and waited patiently for their response. Documentation was in various forms that represented children's home and community environments.</p> <p>Rooms were well organized, and bins were labelled to help support maintenance and care. Materials were easily assessable and on children's level for easy access.</p> <p>Art materials were in each environment giving children opportunities for painting, modelling, collage and mark making. Inspector had conversation with admin on the importance of open-ended art that is child led.</p> <p>The outdoor area had lots of props/equipment to give children opportunities for risk taking and vigorous play. Playground was clear from any ice buildup to ensure safety of children,</p> <p>All checks were observed and complete. One order for compliance was given for a green foam block in disrepair but was corrected during visit. All staff files were reviewed and complete and a random review of children's files were also observed ad complete.</p>
