**General Comments**

The Quality Assurance Monitor in on site for a Monitoring inspection. Ratio was respected.

The following elements were observed:

- Child Records
- Checks
- Personal belongings
- Nutrition

The Quality Assurance Monitor observed the children in transition to getting dressed to go in the outdoor play area. The QAM observed the operator making brown bread while the children were waiting to go outside. The operator verified with the QAM if it was ok to put an educational program on a tablet while the kids waited to go outside. The QAM tells the operator that she can place an educational program for short period of time. While the use of televisions, or a tablet is not recommended, if they are used the followings is to be applied:

- television or tablet viewing is limited and is not used daily.
- they are not used to fill gaps in the day.
- the programs or movies support curriculum, programming and investigating children's areas of interest for example, children want to search out information on a specific area of interest.
- programs or movies are developmentally appropriate.
- viewing the program or movie is one of several choices of activities for the children.
- children are not encouraged to watch television if they would prefer to be involved with other activities.
- with preschool children, staff members watch with the children, extend their understanding and promote discussion on the program or movie.
- for school-age children, staff members ensure that children are supervised while watching television or a tablet.
- if possible, televisions are not stored in rooms.

General Comments

The QAM also had a discussion with the operator and an associated person regarding smoking. The QAM referred to the New Brunswick regulation 2018-11 under the Early childhood services act. The QAM reminds the operator that smoking is prohibited during operating hours on the premises of a licensed facility. The operator expresses the concern of needing to go outside of the property during the winter.

No deficiency during the monitoring.
