Order for Compliance	Regulation	Date to be corrected	Date corrected
39(2) A licensed facility shall have a separate locked storage space that is inaccessible to the children for each of the following: (a) toxic products, chemical products and cleaning supplies;	39(2)(a)	Jul 30, 2020	Jul 30, 2020
Comments: Deficiency is now compliant			

<p><b>General Comments</b></p> <p>Administrator stated that she has not had to use potential illness forms as there has not been a child who has had to leave the facility sick. They are aware that if a child becomes ill, they are to be separated and picked up within 1 hour of notification. The potential illness form would be filled out and signed by parent(s) upon pick up.</p> <p>Filing system is meticulous and information regarding the regulations could be easily verified.</p> <p>Each group has pre-planned programming. Educators stated that they adjust it based on the children's interests. Documentation of their learning is evident and children are able to describe what they are doing on a daily basis.</p> <p>Incident logs and reportable incidents are being filled out as per legislation. Please keep log and reportable incidents separate.</p> <p>This facility uses a municipal outdoor play space as their licensed space. Children play in two separate areas if both groups are outside at the same time. Administrator stated that space is inspected for areas of concern prior to using it and a monthly outdoor checklist is being filled out. Any and all problems are reported to the city. There were no evident issues at time of visit.</p> <p>Toxic products are stored upstairs in a locked closet, as well as, downstairs underneath the kitchen sink. The safety devices currently used to keep children out of them are no longer approved by the Department. Toxic Products must be secured by lock and key. Administrator stated that she can lock kitchen door as she has a key to the door. Toxics were locked at time of visit.</p> <p>The school age room without the air conditioner was very warm at time of early morning visit. To avoid any health issues for the children, it is recommended that a cooling system of some sort is used to provide a cooler</p>
---

General Comments

and healthier environment for the children.

Covid-19 Guidelines are being implemented and followed by all staff. Hand washing is evident, screening is being completed properly; the screener is masked, the group logs and attendance records match, documentation is being completed as necessary, infrared thermometers are only being used for staff and visitors and children's temperatures are being taken under the arm. The facility is clean, extra cleaning was observed at time of visit and cleaning lists are being filled out.
