General Comments

Licensing Staff arrived at the facility to conduct a Monitoring Inspection. Upon arrival, the school age children were observed playing outside in the fenced in playground. A small group of children were observed playing on monkey bars while others cleaned and re-arranging the play kitchen area. All other classes were inside the facility transitioning from quiet time to afternoon snack.

In the Junior Infant room, the infants sat together at the table as they ate afternoon snack. The Educator sat at the table with them, engaging in conversation. In the Senior Infant room, one Educator sat at the table with the children at the table, preparing for snack time while the other Educator changed diapers and washed hands. Downstairs in the 4 & 5-year-old class the children gathered together as the Educator read "Take Your Pet to School Day". Once the story was finished, the children lined up to use the washroom before sitting with the Educator who applied their sunscreen. The transition from inside to the outdoor play area was smooth. Water bottles were filled and brought outside.

A conversation was had with the Operator on site today regarding outdoor play time, especially in the summer months. From a previous monitoring visit, positive changes have been made to the infant outdoor schedule and the outdoor play area. Picnic benches have been moved to a shaded area, and the infants now go outside later to ensure they are not outside for an extended period of time.
