General Comments

Licensing Staff arrived at the facility to perform a Monitoring Inspection. Upon arrival the children were engaged in a variety of tabletop activities. The indoor environment was bright, clean and well-organized. The facility is in the process of decorating the halls, cubby area and classrooms for the winter months. String lights, snowflakes and other holiday decor was also displayed throughout the classrooms.

As noted on the previous Monitoring Inspection Report, there was a lack of materials in the 3-year-old classroom. Since the last visit, several new play areas and materials have been added to the classroom. A large play kitchen area with dishes, play food and utensils was observed. Near the tables on a low shelf there were a variety of crafting materials such as pom poms, stamps, paper, crayons, markers, glue and beads. A small group of children were observed playing with dolls and a wooden dollhouse while others colored at the table and played with a lite brite.

Later in the afternoon the classes were observed having afternoon snack. Proper hand washing was observed before the children sat at the tables to eat. After snack the children transitioned back into free play. In the 2-year-old classroom the children sat at the tables with the Educators, using Playdoh to make balls and other shapes. In the 4-year-old classroom several winter themed invitations were set up for the children to explore. Families were greeted as the children left at the end of the day and attendance records were updated as they left.
