Comments: Deficiency is now compliant			

General Comments

Monitoring visit performed today. Children napping during my visit.
 *All staff employed are meeting the training requirements for July 2020 under the NB regulations.
 *I reviewed my last follow up visit to check on pea gravel requirements for the afterschool outdoor play area and that maintenance was being performed. The maintenance checklist was last completed in September. Please continue to complete monthly checks. As per discussed with the Administrator more pea gravel is required under and around the climber and slide. The Administrator is aware and more has been order. As per stated under section 9.3.2 "what you need to know" the requirements is 30 cm depending on the types of protective surfacing ie. pea gravel. In the meantime, I would recommend that these structures are not used for safety purposes until the appropriate level of surface material is in place.
 * last fire drill recorded in September. Please ensure that fire drills are performed monthly. Thank you.
 * I provided the link for the NB Regulation and ECS Act during my visit. All staff should be familiar with them and signing off that they have read them.
