Comments: When the Quality Assurance Monitor arrived on site children were getting inside. The Quality Assurance Monitor observed children getting undress and the educator putting the children's things away at their cubbies because the children are not able to easily reach their cubbies. The Quality Assurance Monitor had a discussion with the operator concerning the cubbies being too high for children to reach on their own. The operator stated that children are not allowed to go to the cubbies because the educator don't want children to go in other children's bag or grab things that parents put in their bag. The Quality Assurance Monitor asked the operator how children get their outdoor clothes when children are asked to get ready to go play outside. The operator explained to the Quality Assurance Monitor that the educators hand out the children's belonging to get ready. The Quality Assurance monitor explained to the operator that children must have an easy access to their belonging. The operator told the Quality Assurance Monitor that hooks will be installed at the height of children for the children to be able to easily access their belonging are their own.
