General Comments

Licensing staff arrived at the licensed facility to conduct a license renewal inspection on January 11th, 2023.

Licensing staff observed an abundance of documentation posted on the walls of each classroom exhibiting what the children have been learning. Also observed during the inspection visit, all educators interacting and engaged with the children at the child's level in all classrooms. The flow of the routine was very smooth in each classroom, even at transition times.

Licensing staff observed only positive child guidance techniques by the educators. One example of this was an educator in the four-year-old classroom encouraged the children to problem solve to reach a solution while the children ran into an issue with sharing the play materials at one of the quiet time centres.

In all of the classrooms, distinct play centres and ample play materials were set up for the children to engage with while receiving serves at the licensed facility.

All toxic materials (cleaning supplies) were stored in a closet that was locked with a lock and key during the license renewal inspection.

Please ensure that all Medicare cards in the children's files are updated with the new expiry dates when the Medicare cards on file at the centre expire.
