General Comments
<p>The children were inside upon arrival. The 3 year old teacher gave licensing staff details about a science experiment that the children had just completed and licensing staff also observed bagel bird feeders that the children made to take home. All age groups are taking pictures of the children's activities and placing them on a social media platform for the parent(s) to see. The educators of younger age groups had paper attached for the children to the walls to allow them to make markings. A great example of how to introduce open ended creative art to the children.</p> <p>The environments are set up with many materials and learning centres for the children to engage with. Educators were seen engaged with the children at their level providing guidance and assistance as needed. Educators were seen playing, reading, comforting, and having conversations with the children in their care.</p> <p>Filing system is organized and complete. All mandatory forms are being filled out and kept on file. Documentation for licensing was easily verified.</p> <p>The operator thoroughly went through the first aid kits and removed anything that had expired.</p> <p>Licensing staff can recommend facility for licensing.</p>
