### General Comments

The Quality Assurance Monitor is on site for a Monitoring inspection.

During the visit, the following elements were verified:

- Child to staff ratio
- Child record files
- storage space for toxic product, chemical products and cleaning supplies
- Washrooms

The ratio was respected at the time of the visit.

All child record files verified are in order

There are sufficient and safe washroom facilities to meet the needs of the number and ages of children

General Comments

enrolled in the facility

The QAM had a discussion with the operator regarding designation requirements. The operator informs the QAM that educators working with preschool children are working on finishing their 10 hours of professional learning, the parent committee members are having their meetings and the QIP is up to date. With that, all designation requirements will be met for the renewal of the license.
