Order for Compliance	Regulation	Date to be corrected	Date corrected
21 The daily activities of a licensed facility shall be purposely planned in advance and documented and shall respond to the capabilities, needs and interests of each child.	21	Sep 02, 2022	
Comments: Not all educators are documenting their programs. Other educators have plans that are planned a month in advance which does not meet the requirements of the Regulations. All educators must demonstrate that planning is a process that involves engaging the children and reflecting on the children's interests, passions, strengths and abilities; must ensure that short and long term plans are flexible and fluid, to accommodate emerging interests and unanticipated events; must provide focus on activities for individuals or small groups of children; and emphasize a strength based approach. The QA Monitor will send a sample planning tool to the Administrator that may be used by all educators.			

<p>General Comments</p> <p>Ratios were respected during the inspection. The QA Monitor observed positive interactions between staff and children; staff were observed bending down to children's level when speaking with them, they were observed holding and offering comfort to crying infants, they were observed intervening when necessary when tensions escalated between several children, redirecting to other activities as a means of positive guidance practice. The QA Monitor discussed with the Administrator that staff may need support from management to choose gym time when the weather does not permit them to take the children outside. A schedule can be created that mirrors the outdoor play time schedule so that all children are offered opportunities for physical activity. The basement stairs must be swept and mopped as dirt and dust has accumulated.</p>
