Order for Compliance	Regulation	Date to be corrected	Date corrected
39(2) A licensed facility shall have a separate locked storage space that is inaccessible to the children for each of the following: (a) toxic products, chemical products and cleaning supplies;	39(2)(a)	Jan 19, 2023	Jan 19, 2023
Comments: The room where all the cleaning supplies and toxic products are stored was unlocked. Toxic products, chemical products and cleaning supplies needs to be locked and inaccessible to children. Administrator immediately locked the door. Deficiency is now compliant.			

<p>General Comments</p> <p>QA monitor and administrator had a discussion regarding article 10(6) of the acts and regulations. The number of children grouped at a full-time early learning and childcare centre shall not be more than the number that requires 2 educators. Operator needs to have a plan to divide the group into 2 groups when the number requires more than 2 educators. During the next inspection, QA monitor or inspector will verify if a plan is in place when numbers require more than 2 educators.</p> <p>During her visit, she reviewed staff records and all is in order. QA monitor asked the administrator for the checks of all the board members in reference to the amendment to the law that was put in place for January 1st. Administrator is still working on getting those checks and will send copies to QA monitor as soon as possible.</p> <p>While QA monitor was on site, she was able to observe indoor and outdoor play. She looked into the staff's programming book and on the white board in the classroom and could see webbing and documentation. That is evidence that the facility implements an inclusive daily program which contains a variety of purposely planned activities, opportunities and experiences.</p>
