General Comments

A monitoring Inspection occurred October 16, 2025

Children were observed indoors engaging in a variety of activities, including playing the game Thumbs Up, Thumbs Down, playing in the kitchen center, and using Barbies in the dollhouse.

The classroom was organized with several well-defined learning centers, including dramatic play, building and transportation, loose parts, games, and art.

Several forms of documentation were observed throughout the room, including photographs, children's writing, and both collaborative and individual art pieces. The room featured an "All About Me" wall, along with self-portraits created by the children.

An emotions board was also present, allowing children to express how they are feeling upon arrival at the facility. Children were actively observed writing on the board to indicate their emotions.

Educators demonstrated positive interactions by using encouraging language and gentle reminders. They asked open-ended questions, listened actively, and extended children's ideas through conversations.

A clearly visible and prominent area was designated for posting the facility's license, current monitoring reports, and any orders for compliance. Additional documentation observed included incident logs, daily attendance records, and records of evacuation and monthly fire drills. The weekly menu is posted and includes any substitutions.
