### General Comments

- Visit done at establishment in the early morning for a monitoring inspection. Upon my arrival the children were preparing to go outside.
- Ratio was respected during the visit.
- Toxic products are stored under lock and key and are not accessible to the children.
- Personal belongings are easily accessible and labelled with the child's name.
- Positive child guidance was witnessed during the visit.
- Parents of children present at the centre are granted entry at all time.
- In all rooms evidence of purposeful planning based on children's interest and learning, invitation, photos and learning stories were posted.
- Staff members files contain all pertinent information.
- Observations: The two groups of children were playing outside. The educators are engaged in the children's play and show interest in what the child is saying.
- Discussion with the director and educator. Recommend that the operator's manual be read. One educator is registered to begin her curriculum in December 2022. The dome play structure is not to be used. Discussion with the director concerning the outdoor playground and structures.
