General Comments

A monitoring inspection occurred today on both school-age rooms on this license. The following items were inspected and were verified complete; incident logs, attendance records, postings required for parent board, planning for school-age program, and indoor play area materials and equipment. Four new staff files were reviewed and verified complete. During the inspection, the Inspector observed the children participating in outside play at the adjacent Rothesay Commons. In the indoor play areas, the children were observed playing with kinetic sand, Lego, trains, Barbies, coloring and creating art. The children in the upstairs program were also observed deciding what they wanted to name their group. Inspector discussed with Educators that once children have finished their snack, they should be permitted to leave the table and go play and interact with the materials in the learning environment and not wait for their peers to finish their snack, unless they want to. Recommending that the parent board downstairs be duplicated and created in the school-age room upstairs so parents from that program have access to all required information for parents. Educators were observed speaking kindly and appropriately to the children during the inspection using positive child guidance techniques.
