General Comments

The Quality Assurance Monitor is on site to conduct a Monitoring inspection.
During the inspection, the followings elements were verified.

- Child to staff ratio
- Child record files
- If all required documents are posted in a visible and prominent place in the facility
- Qualification and training of educators

During a review of child record files, the Quality Assurance Monitor noted that several profiles listed a hospital or clinic as the child's medical practitioner. If a child is currently on a waiting list or does not have a designated medical practitioner, parents should clearly indicate this in the profile rather than listing a hospital or clinic. The Quality Assurance Monitor recommends that the operator review all child records and reach out to parents to update the information accordingly

The Quality Assurance Monitor followed up with the Operator via email regarding designation requirements, as the renewal of their license is approaching.

During the monitoring inspection, children played outdoors.

No non-compliances during the visit.
