The operator must ensure that all employees obtain a Criminal Record Check with Vulnerable Sector Check prior to employment. The remaining Vulnerable Sector Check is provided to the inspector by email later that day.Deficiency is now compliant

Comments: The inspector observes that lunch boxes and water bottle are not labelled with the children's names. The operator must ensure that personal belongings brought into the facility are labelled with the name of the child, used only by the intended child, and stored separately for each child.			

General Comments

The inspector is on site to conduct a renewal inspection. During the inspection, the inspector observes outdoor play, lunch, rest period, afternoon snack, transitions to the washroom, and a Halloween painting activity in the afternoon.

The inspector discusses with the administrator that a board on the patio ramp is loose and may present a potential safety risk to children if not repaired. The operator must repair or replace the board to help ensure a safe environment for the children. The inspector will verify that the repair has been completed during a follow-up inspection at a later date.

The inspector observes consent forms for indirect supervision in the files of children aged 2 to 5 years. The inspector discusses with the administrator the requirement that children be adequately supervised at all times while attending a licensed childcare facility. The inspector requires that these consent forms be removed from the children's files and will verify their removal during a follow-up inspection at a later date.

General Comments
The child-to-staff ratio is respected throughout the renewal inspection.
