General Comments

Licensing Staff arrived at the facility to perform a Monitoring Inspection. Upon arrival, the children in the 3-year-old room were still napping while the other classrooms were engaged in a variety of quiet time activities.

Soothing music was heard in all rooms as the rooms transitioned from quiet time to activities. In one classroom, the children have been showing an interest in food. The Educator sat a small group of children as they made smoothies, discussing what ingredients and flavors they like and dislike. Other children were observed playing doctor and using rolling pans and cookie sheets along with playdoh. The rooms offer a variety of natural materials such as stones, rocks, wooden discs and blocks. The transition from activities to afternoon snack was smooth. The tables were sanitized before and after the children ate and proper hand washing was observed.

All classrooms are bright, welcoming and clean. Pictures of the children with their friends, artwork, family pictures and learning stories were observed in all the rooms. In one room, the Educator has created a binder full of learning stories and pictures of the children and their peers for the child to look through. Only positive child guidance was observed. The Educators were engaged with the children throughout the visit. Families were greeted as the children got picked up, and children were observed hugging Educators before leaving.
