General Comments
The inspector is on site to conduct the renewal inspection. During the inspection, the inspector observed the lunch period, indoor free play, and children participating in various activities. Some children are engaged in a card game with an educator, while others are completing a craft activity involving the creation of a grocery list and cutting out sale items. A discussion took place with an educator regarding the outdoor play area. The designated outdoor play space for school-aged children is the Apohaqui Elementary School Park. As this park is not part of the licensed daycare premises, it was not inspected as part of the renewal inspection. It remains the operator's responsibility to ensure that the outdoor play area is safe and appropriate for children. Any safety concerns should be communicated to the school so that corrective action can be taken as needed. Another discussion is being held regarding children's personal belongings, including water bottles and lunch boxes must be clearly labelled with each child's name. Positive child guidance practices are observed throughout the inspection. Educators are engaged with the children and interact with them in a respectful, calm, and supportive manner. The ratio is respected throughout the inspection.
