### General Comments

Visit to the facility for the annual inspection.  
Ratio was respected during the visit.

#### Outdoor park:

The following structures do not meet protective surfacing requirements, therefore it is recommended they not be used unless surfacing is added to meet regulations:

Field area: Large structure with blue, yellow and red, the swings and large yellow slide.

Upper level near school: round swing, older play structure with red tunnel.

In the upper level play area near school, the rock wall, swings and newer play structure can be used. Protective surfacing must be raked regularly to ensure surfacing requirements are met.

Four newer structures were not inspected due to too much water covering the protective surfacing. These will be re-inspected once the ground is dry.

#### Observations:

Mutiple stations were set up, lego, figet toys, construction, dramatic play area and coloring etc. Children had snack and were getting ready to go outside.

This facility meets requirements under the Act and regulations, recommending license for another year.
