Comments:			

General Comments
<ul style="list-style-type: none"> -Visit to the center to complete a monitoring inspection. - Ratio was respected during the visit. - The indoor space provides a large variety of material for children to explore, create and play. The space is safe, and the material is well maintained. -Children are into animals, educators started to create documentation material with the them describing their animal's natural habitat, what they eat...etc. -Cleaning supplies are in a locked cabinet. - I observed that the educator used positive child guidance technique, she was respectful to each child rhythm and is attentive to their needs. -Children's files have all the required information but some are missing the Medicare number and the expiration date are overdue.
