<p>General Comments</p> <p>monitoring visit performed.</p> <p>*I reviewed child attendance records and staff were tracking arrivals and departures. A small group of preschool age children were present today. All children went down initially for a nap but 2 got up shortly afterward to participate in some quiet play activities. They were really exceptional at playing quietly while other children had a nap. However, I would recommend after an hour to maybe open up the blinds in the area where children were playing quietly.</p> <p>*Staff attendance must include the last name of the employee. Please remind staff to sign in and out upon arrival, and when leaving and returning from lunch breaks etc.</p> <p>*The allergy sheet posted on the parent entry board could be posted inside a cupboard in the kitchen. The allergy sheet on the parent board must not include the children's names. Thank you.</p> <p>*More than half of the staff have met the NB Regulation training requirements of section 11 (c) (i) (ii) (A) (B) whereby they have either completed their 1 year ECE certificate program or completed the 90 hour intro to ECE. The Administrator also holds a 1 year ECE certificate. Great job!! I also noticed that all staff take advantage and participate in annual PD training opportunities.</p> <p>Incident log book is being kept up to date and is neatly organized and stored chronologically in a binder.</p> <p>I noticed the programming room had been rearranged. It is more open, and organized to permit children more flexibility and opportunities to explore. It encourages children to participate in many programming stations and with a variety of toys, equipment and materials that are available to them.</p> <p>School age program is still in operation. There are 13 children enrolled in the program this school year.</p>
