General Comments

Children engaged in indoor and outdoor play this morning. Many positive interactions between educators and children observed. The learning environment is set up with a variety of invitations for the children to explore that include math, literacy, fine motor activities and art.

Documentation is posted that highlights the children's interests and learning. The children are currently transitioning from an interest in vet clinic/ pet store to restaurant. The children have created signs and menus to add to their restaurant in the dramatic play area. Educators have displayed the children's treasures they have found outdoors throughout the indoor play area. They have also displayed the lunch notes from parents for the children to revisit throughout the day as they have just begun bringing their lunches to child care after reopening. This is a wonderful way to bring home into the environment!

Incident log: Incident logs are currently being added to children's files. Incident logs must be kept in chronological order in an incident log file or binder.

Ensure COVID-19 visitor log is maintained.
