Comments: In the classroom, the QA monitor went through the educators programming tools. The activities were well documented, but the purposely planned activities were not recent. The daily activities of a licensed facility shall be purposely planned in advance. Educators need to demonstrate that planning is a process that involves engaging the children and reflecting on the children's interests, strengths and abilities. The daily program should include a variety of activities purposely planned according to the ages and development of the children.			

<p>General Comments</p> <p>The QA monitor had a discussion with the administrator on site regarding the inspection reports that needs to be posted in a visible and prominent place in the facility. The only report that was posted was the renewal inspection. Monitoring inspection reports also needs to be posted until the next monitoring inspection is conducted. The administrator will add the monitoring inspection report of today's inspection to the bulletin board.</p> <p>During the monitoring visit, the ratio was respected. The QA monitor was able to observe the kids play indoors and getting ready for outside play.</p>
