General Comments A renewal inspection was conducted during the morning hours for both the preschool and school-aged programs. The preschool children were observed participating in a variety of indoor and outdoor activities. Indoors, children were engaged in snack time, playing with cars and trucks, and interacting with educators in the dramatic play area. Outdoors, children participated in water play, played catch with educators, and used the climbing structure. The school-aged children were observed indoors prior to leaving for a nearby playground. During this time, children were engaged in snack, building with Lego, playing foosball, and coloring. Documentation was current and reflected the children's recent learning experiences. Photographs of the children and samples of their artwork were displayed throughout the learning environments. Educators shared that the preschool children's current interests include building activities, sensory play, cars, reading, and sports. The school-aged children currently demonstrate an interest in nature and building activities. The following records were reviewed: Incident logs, fire drill records, daily attendance records, professional learning hours, a sample of children's files and all staff files. Handwashing practices were also observed during the inspection. The Inspector discussed the following items with the On-Site Administrator: • Two staff members require additional professional learning hours before September 30, 2026. The administrator is responsible for ensuring all staff complete the required 10 hours of professional learning by September 30, 2026. • A reminder was provided that all children must be signed in on the government attendance records immediately upon arrival. Attendance records must remain accurate and up to date throughout the day. The facility is recommended for licensing.
