General Comments
<p>Upon arrival the children were engaged in activities of their choice. The environment set up has changed since last visit. There are more defined learning centres set up and the children have an abundance of materials that they have access to. This includes but is not limited to dramatic play, cars, games, Lego, building toys, blocks, a doll house, puzzles, and art materials. New rugs have also been added to the learning environment giving it a brighter and cozier feel.</p> <p>Prior to going outside, the children engaged in a Father's Day craft where the children made a coupon book for their parent. The children then went to the washroom and then outside. The educators were engaged with the children by pushing them on the swings and having conversations with them. A good relationship was evident between the children and educators. There also seemed to be a good rapport and communication between the educators and parents as pick up was occurring.</p> <p>One of the educators was interested in having information regarding child guidance and challenging behaviours. Licensing staff advised them that they would forward resources to them in the summer.</p> <p>The first aid kit was based on the old list. A new list of materials based on Worksafe NB will be forwarded to the facility.</p> <p>Please keep an attendance record for all staff and volunteers in the facility in the Fall. The program director stated that they were going to make a monthly one as attendance for staff are currently kept with the executive Director off site.</p> <p>Child and staff files were complete. Attendance records are being kept for children. Fire Drills are being</p>

completed, and incident logs are being kept for children. The program director stated that they have not had to use potential illness forms as sick children go home before the program starts or stay home. All required documentation was verified for licensing purposes.

I can recommend licensing pending a current health inspection.
