Name of Early Learning and Childcare Licensing Staff Nancy Glendenning		Position Title Inspector	
Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

The educators are very aware and respond to the children's needs in a positive manner. At time of visit, educators were seen giving children gentle reminders and redirecting when necessary. Educators were observed engaging with children and speaking to them at their level. In instances where children appeared upset educators would comfort them.

Children engaged in outdoor play at time of visit. A space outside the fenced in area is being used for play so that facility can respect the Covid-19 guidelines regarding bubbles. Licensing staff discussed this situation with the Director and it was stated that this space is being used for more teacher guided play. It is advised that the space can continue to be used however educators must create boundaries for the children and ensure that the children are staying within the parameters outlined. It is also advised that the Administrator check with their insurance company regarding the use of space that does not meet regulations under the Act to ensure that facility has appropriate coverage.

Lock and key areas are apparent for both medications and toxic products in classrooms and kitchen. Licensing staff discussed storage of medications that require to be put in the fridge with Director. There is currently no medications that require to be put in fridge but Director was advised that medication would need to be locked should the situation arise. Director was advised to purchase a lock box.

A pre-written plan has been developed in the classrooms and their is documentation visible of the children's learning.

Please ensure that educators are keeping cleaning lists up to date in each room and area in facility. Also, please ensure that diaper changing mats are picked up and cleaned underneath after each use.
