General Comments

A Monitoring Inspection was conducted on August 23, 2024, during which various aspects of the facility, children, educators, and curriculum were observed.

The children were engaged in indoor free play, and educators noted the children's current interests, including excursions to the park, water play on hot days, and open-ended art projects. The educators were observed using positive language and giving gentle reminders. The facility maintained a welcoming atmosphere, with parents and children greeted enthusiastically upon arrival. Snacks and meals were provided at appropriate intervals, and books reflecting the children's interests were available.

The facility had well-defined learning and play areas, with children's artwork displayed throughout. Drinking water was accessible throughout the day, and the infant outdoor play area was separated from other children's play areas, with stationary equipment surrounded by protective surfacing.

The curriculum was actively extended outdoors, and efforts were made to incorporate the natural world into the classroom. Documentation was observed throughout the facility, and a discussion with the onsite educator highlighted the strengths of family inclusion and current learning stories. However, the need for a new lock on the upper cabinet was identified, as the existing one was not securely attached.
