28(3) The premises of a licensed facility shall comply with (a) lighting, ventilation and other general health standards under the Public Health Act.	28(3)(a)	Aug 31, 2022	
Comments: Sands box needs to be covered			

<p>General Comments</p> <p>-Visit at the facility for an unexpected monitoring inspection. -Ratio was respected during the visit. -All play area is maintained safe and clean for children to have a clutter-free environment to explore. Most rooms have a sufficient amount of toys, games and material to play, learn and explore but one room needs to increase the material and create zones that are welcoming to children. Ideas and suggestions were exchanged with the educator and administrator; a follow-up visit will be made to see Improvements. -Programming is purposefully planned and documented, children have opportunities to explore different types of literacy, express creativity and experiment with arts and science. Opportunities for indoor and outdoor physical activities are also provided to children. Had a discussion with an educator about being less involved into the children's art and give them more space to be creative. -Children's guidance is done in a respectful and positive way. -Has stated in public health standards, the three sand boxes in the outside space needs to be covered. -Food brought from home is labeled with the child's name and refrigerated as required or has an ice pack, menus are given to a parent at least 3 days prior to serving the food, drinking water is provided throughout the day.</p> <p>Observations: When arriving at the center educators were getting the children ready to go outside, they then came in and got ready for lunch. Once they were done eating educators got children's ready for naps and quiet play for the oldest kids.</p>
