General Comments
<p>A Monitoring Inspection occurred this afternoon, June 5, 2024.</p> <p>During the inspection, children were observed engaging in indoor free play. Educators noted that the children are currently very interested in spending time outdoors for the summer, creating a rocket ship from cardboard, and making perler bead art. The educators were observed using positive language and providing gentle reminders to the children. They actively discussed ideas with the children, asking questions and expanding on the ideas presented by the children. One educator played an active role in the children's activities, by engaging in art activities to create costumes from paper.</p> <p>The facility allows parents of children present to enter at any time. The room is set up to be inviting, with materials that encourage children to play. Books reflecting the children's interests have been selected, and well-defined learning and play areas were observed. Numerous pieces of the children's artwork were displayed throughout the facility. Traffic areas are kept clean, and outdoor walkways are free of clutter. Drinking water is provided throughout the day.</p> <p>The curriculum offers opportunities for both individual and group experiences. Picture documentation was observed throughout the space. Educators provide opportunities to extend the curriculum outdoors and make efforts to bring the natural world into the classroom.</p>
