Comments: The Quality Assurance Monitor conducted an on-site inspection related to a change in service. During the inspection, child-to-staff ratios were verified, and 32 children were present on one side of the gym. One group of children was transitioning to eat their morning snack, while the second group was seated at the tables waiting to be served their morning snack. The maximum approved capacity for that side of the gymnasium is 30 children. The indoor play area must have 3.25m² of indoor play space per child. Upon the Quality Assurance Monitor's observation and request, the second group returned to their classroom, located in the other section of the gym to eat their morning snack. This action brought the number of children within the approved capacity limit for the space of 30 children. Deficiency is now compliant			

General Comments
The children were observed transitioning to eat their morning snack and playing in the indoor play area. The Quality Assurance Monitor observed the children drawing on paper and playing a card game. The children also transitioned to the outdoor play area.
