**General Comments**

**QAM Monitoring Visit – Afternoon Observation**

During the afternoon monitoring visit, the QAM arrived while one group of children was outdoors with two educators. Children were observed participating in soccer, ball hockey, and using the playground equipment. Educators were positioned to maintain appropriate supervision and were engaged in conversation with the children.

When observing the inside group, children were observed participating in board games, building activities with various materials, and drawing. An educator reported that the monthly project focus is Art. As part of this project, each child is creating an individual art piece that will be combined at the end of the month to form a collaborative group artwork.

During the visit, one child displayed an outburst. The educator addressed the situation by speaking calmly and offering the child choices, consistent with positive child guidance practices.

The Parent Board, fire drill documentation, and child-to-staff ratios were reviewed and found to be accurate and up to date.
