

## Early Learning and Childcare Facility Inspection Report

Type of Inspection:  
Monitoring Inspection

Pursuant to section 21 of the *Early Childhood Services Act*, operators of licensed early learning and childcare facilities must post their most recent inspection report in a clearly visible and prominent place in the facility.

### General Comments

A Monitoring Inspection occurred October 9, 2025

The children were observed getting ready to transition outdoors and engaging in a variety of outdoor activities. Once outside, they participated in various play experiences including sliding down the slide, playing soccer, baking pretend cakes in the mud kitchen, and climbing on the dome structure.

All rooms were thoughtfully arranged with age-appropriate materials that invited children to explore and play. Clearly defined learning and play areas were observed, and children's artwork was prominently displayed throughout the facility. Daily routines were posted in each room, supporting consistency and predictability for the children.

Educators demonstrated a strong understanding of positive child guidance strategies, including redirection and problem-solving facilitation. They consistently remained at the children's level, provided appropriate supervision, and used positive language throughout interactions.

A clearly visible and prominent area was designated for posting the facility's license, current monitoring reports, and any orders for compliance. Additional documentation observed included daily attendance records and one new staff file.

A conversation took place with the Operator regarding the following:

- The storage bin in the play yard was broken at the top, allowing water to collect and create standing water. The operator confirmed that a new bin has been ordered and the broken one will be removed.
- A plastic playhouse was broken and had sharp edges. It was removed during the licensing visit, and educators stated that a replacement is available indoors.
