| <p><b>General Comments</b></p> <p>Quality Assurance Monitor observed children eating snack, entering into freeplay including blockbuilding. QAM observed Educator allowing children to use a circle table on it's side, while supervised, in order to further their construction, promoting appropriate risky play. Children were also observed engaged in reading, crafts with stickers, wobble boards, and music. QAM observed the infant room leaving for a trip to a local retirement home to visit in their strollers. The other children were observed preparing for outdoor play, and then playing in the park outside.</p> <p>QAM observed low and accessible documentation on the walls of each room. Many of the paintings and crafts posted have descriptions explaining what the child has drawn or created along with the date completed. All items observed are compliant at this time.</p> |
