

## Early Learning and Childcare Facility Inspection Report

Type of Inspection:  
Renewal Inspection

Pursuant to section 21 of the *Early Childhood Services Act*, operators of licensed early learning and childcare facilities must post their most recent inspection report in a clearly visible and prominent place in the facility.

Name of operator NORTHEND LEARNING CENTER INC.	Licence Number 2013610	Inspection Date May 24, 2019	
Facility Name NORTHEND LEARNING CENTER 2		Telephone Number (506) 384-5437	
Address 96 Gorge Road Moncton NB E1G 1E6			
Name of Early Learning and Childcare Licensing Staff Erin MacLaggan		Position Title Quality Assurance Monitor	
Order for Compliance	Regulation	Date to be corrected	Date corrected
12(2) An operator of a licensed facility shall ensure that a criminal record check or a vulnerable sector check, as the case may be, and a check with the Department of Social Development is conducted on each individual before he or she becomes a staff member.	12(2)	May 24, 2019	
Comments: A new staff was hired before the SD Check was returned from SD.			
28(1) An operator of a licensed facility shall not change the allocation of space used to provide services or add to or alter any building or facility or any part of them unless the Minister has approved the changes in writing.	28(1)	May 24, 2019	
Comments: A large shelf was installed in this room, the length of one wall. QA monitor verified that although it reduces the measured play space, there is still enough room for the number of children on the license. Any changes impacting play space must first be communicated to QA Monitor.			
31(3) An operator shall maintain the outdoor play area of a licensed facility to ensure the safety of the children.	31(3)	May 31, 2019	
Comments: A metal bar is imbedded in the ground of the play ground. There is no longer a climber installed on this bar and, being exposed, it causes a hazard and must be removed immediately. The storage box in the play ground is broken, no lid and has sharp edges – it must be disposed of immediately. Inadequate storage for toys – many toys strewn around the yard and the buckets are filled with rain water and must be dumped out. Standing water was observed in the play ground, and in the tires. Water must not be permitted to accumulate – adequate drainage on the ground and in the tires is required.			
33(2) Stationary equipment in the outdoor play area shall be surrounded by a protective surfacing and installed according to the manufacturer's instructions.	33(2)	Jun 24, 2019	
Comments: the protective surfacing is an inadequate depth to protect from a fall, children are not permitted to use the equipment until this is corrected.			
33(3) An operator of a licensed facility shall complete a monthly review and maintenance plan on all stationary equipment that includes the following information: (a) the review and repair dates; (b) the action required and the action taken; and (c) the name of the staff member who conducted the review.	33(3)	May 31, 2019	
Comments:			

General Comments

QA Monitor observed positive interactions during the inspection.

Room has adequate play area for the number of children on the license. Operator is reminded to contact QA Monitor prior to any further changes to the room.
